

**Marine Life Protection Act Initiative  
Public Comments Submitted  
through October 25, 2010**

Dear California law makers,

I'm Azja Czajkowski and I am ten years old. I've been going to Birch Aquarium my entire life. Two weeks ago they posted some thing about the Marine life Protection Act, and that got me thinking.

Not only are the fish that live in our kelp forests offshore pretty, they are also crucial to the survival of our ecosystem. Many animals such as seals, sharks, and bigger fish survive of of only them. So if we humans (who can dine of of some thing else...) fish out of there, many other animals may starve.

Thats when MPAs are important. they keep you from fishing in endangered places. We have a few, but not nearly enough. Thats why our marine dwelling inhabitants population has been shrinking. I strongly urge you to make more and expand MPA zones.

This is how extinction happens. numbers go way low, and nothing happens. we don't want that to happen, and we've noticed, so there isn't any reason why we should do nothing.

Azja Czajkowski

**Subject:** North Coast

The Unified Array is the chance for the BRTF and the whole MLPA process to achieve a measure of legitimacy in the eyes of stakeholders. If the BRTF and its RLF staff steps in with its own "Preferred Alternative" once again, I can guarantee you that you are truly creating paper ocean parks that will be violated at every opportunity because the whole process will be revealed once and for all as illegitimate and corrupt. Because the science and SAT are already so suspect, and the fact that water quality, existing management, etc have not even been considered starting from the northern Channel Islands to the South Coast, it would be folly to override a unified stakeholder process. Do the right thing and take advantage of the unprecedented stakeholder unity on the North Coast - Support the Unified Array.

**Subject:** Northern boundary Ten Mile MPA

I went & checked Bill Lemos' tape on the wax myrtle designating the northern boundary of the Ten Mile array. Unfortunately, it cuts out the safest & most popular access trail to the rocks where many people go to fish & gather. I'm sure Bill didn't intend for this to happen and it only did because he is not as familiar with the area as I am.

This trail is less than 100 feet south from where he has his marker; the rocks extend south only maybe another 500 feet south.

CalTrans has provided a large parking lot, paved trails--one going all the way to the water's edge-- and interpretive panels for this public access. It would be unfortunate if the access for subsistence, shore based fishing & gathering were bisected by the MPA boundary. Again, this is the only public access for such gathering between Cleone & Westport--nearly 12 miles.

It would also be exceedingly difficult to enforce this proposed boundary. Did anyone consult with CalTrans about closing off this public area?

I suggest moving the boundary at least 600' south. Best yet would be to move it to the south edge of the public lands where there is a natural barrier to access.

The Westport Municipal Advisory Council was adamant about keeping this access open. They and I believed it would be.

It shouldn't take a major amendment to the current proposal to do a minor boundary line adjustment to keep this important public access open.

**Subject:** Re: Query regarding viewing the NCRSG proposed array on MarineMap

Hi Jim,  
According to my calculations yesterday with a GPS unit, the bench is N 39°35' 55". So, I've asked that Darci write in to the description of the SMR: N 39°35' 54" (which is 100± feet south of the bench). I flagged it, with the coordinates on a piece of green flagging, on a little wax myrtle right on the edge of the cliff just off the trail to the south of the bench. Hope that this clears this up.

**Subject:** letter addressing the proposed north coast section closure

October 21, 2010

To whom it may concern / MLPA closures:

While I too am concerned about over-fishing and environmental degradation to our coast, I do not like the proposed idea to eliminate all fishing and abalone gathering north of the Ten Mile River estuary. I am very familiar with this region and it's resources. The area from the Ten Mile River to the north of Westport has always been a good fishery and still is. I have seen abundant abalone there, due to private ownership of property and accessibility to the ocean. It also has not been over-used as has the area to the south. It seems you intend to block the area where there is abundance and not where it is not.

I urge you, for the sake of the Westport village area and it's livelihood, to reconsider that boundary and move it north to Juan Creek.

"Let your dreams devour your life, rather than your life devour your dreams."

Subject: MLPA North Coast Round 3 Summary

Attn: Mr. Ken Wiseman  
MLPA-I Team  
Regional Stakeholders  
Science Advisory Team  
Blue Ribbon Task Force

To Whom It May Concern:

Please accept this letter as my written objection to the proposed boundaries of the Vizcaino SMCA. Specifically, I object to the closure of the DeVillibiss Ranch otherwise known as the Rockport Ranch to all take. I strongly believe the closure of the Rockport Ranch via the Vizcaino SMCA is an arbitrary and capricious decision.

The Rockport Ranch is already being managed for limited and sustainable take of abalone and rock fish. It is imprudent to prohibit take of any species in an area that is already being successfully managed. During the decision process of the Vizcaino SMCA; what was the rationale for closing this area? The decision should have included the answers to two simple questions. What are you protecting and what are you protecting it from? While the species you are protecting can be easily identified, what you are protecting them from [on Rockport Ranch] cannot.

I have lived on the north coast for over 15 years. I have had the great opportunity of exploring the coast line between Crescent City and Fort Bragg by boat and auto. However, there remains many miles of the aforementioned coastline that one cannot access by boat or automobile. Simply, there are areas of the north coast that are already protected because they are inaccessible..

I strongly urge you to reconsider the Vizcaino SMCA to include the following.

1) Changing the allowable usage in the SMCA to include shore access and "recreational take" (Abalone and rockfish included) or

- 2) Place a 1000' shoreline access "Ribbon" similar to the Stewarts Point on in the North Central MLP or
- 3) Move the south end of the current version of the Vizcaino to a point on or above Frank Soldier Point.

Respectfully,

The Honorable Cindy Gustafson, Chair  
Blue Ribbon Task Force, MLPAI  
1416 Ninth Street, 13<sup>th</sup> Floor  
Sacramento, California 95814

Dear Ms. Gustafson:

The California Fisheries Coalition, and each of its partner organizations, supports the Unified MPA Array for the North Coast MLPA region. Our Coalition has constructively participated in each region of the MPA adoption process always working collaboratively with all stakeholders in search of common ground to the maximum degree possible.

We are extremely pleased that our efforts and the efforts of all other stakeholders in the North Coast region have resulted in a complete consensus and a unified proposal for a regional MPA network. I think all will agree that such a widespread consensus is an historical event.

Stakeholders followed closely the generic guidelines laid out by the SAT and included necessary and appropriate consideration for the significantly unique ecological, social, cultural, and economic conditions of the North Coast. As we all know "one size" does not fit all situations or regions and acting otherwise defies logic, common sense, and good government.

We encourage the BRTF (and the Fish & Game Commission) to adopt the Unified MPA Array. However, if the Task Force feels some modifications to the Unified Array are necessary, we request it respect the hard work of the local stakeholder community and refer such needs to the stakeholders to further identify necessary changes, instead of simply directing staff to unilaterally develop alternatives.

Thank you for considering our request,

Sincerely,

Trustees -

Re: **Northern California Regional Stakeholder Group (NCRSG) Unified Proposal**

Dear Ms. Gustafson:

I am writing on behalf of the Central California Council of Diving Clubs (CEN CAL), an organization that represents skin and SCUBA divers throughout northern and central California, including many on the north coast. CEN CAL has actively followed the lengthy negotiations and hard work that went into creating the Unified Marine Protected Array proposal that was developed for the North Coast region through negotiations among all the stakeholders. CEN CAL strongly supports the unified proposal as it currently exists and requests that it be adopted without further changes or modifications.

Sincerely yours,

### **Re North Coast Region Proposed Array**

Ocean Protection Coalition (OPC) urges the Blue Ribbon Task Force (BRTF) to recommend the California Fish & Game adopt option “0” for the North Coast Region (NCR) because the MLPAI has failed to demonstrate:

- the need for the development of marine protected areas (mpa) in the NCR

- the use of best available science in determining “scientific guidelines”

- that “sources and sinks” have been identified and taken into consideration in the siting of mpas

- mpas will not produce urchin barrens

- mpas will not drive fishers into extinction

- enforcement is economically feasible

Further, OPC believes the MLPAI is politically—not science—driven. Several members of the BRTF are in conflict of interest, most obviously, Catherine Reheis-Boyd, President of the Western States Petroleum Association, who repeatedly lobbies for opening up the entire coast of California to offshore oil drilling.

OPC again, requests Mrs. Reheis-Boyd and anyone else with blatant conflicts of interest, to recuse themselves from these proceedings.

The MLPAI has also repeatedly violated State law regarding public process and access to material and data.

If, however, the BRTF refuses to choose option “0”, OPC encourages them to accept the “Unified Array” with only one minor adjustment.

The northern boundary of the Ten Mile mpa bisects a public access area owned & managed by CalTrans. For this public access, CalTrans has provided a large parking lot, interpretive panels, viewing benches and paved trails--one going all the way to the water's edge. Within approximately 200 feet of this paved trail, there are two paths going down to the flat inter-tidal rocks.

The proposed boundary is between those two paths. On the south side, within the mpa, the boundary cuts out one of the safest & most popular access trails.

It would be unfortunate if this area--long used for subsistence, shore based fishing & gathering--were bisected by the MPA boundary. This area is the **only public access for such gathering between Cleone & Westport--nearly 12 miles.**

It would also be exceedingly difficult to enforce this proposed boundary. Did anyone consult CalTrans about closing off half their popular public access area?

I suggest moving the boundary at least 600' south. Better yet, move it to the south edge of the public lands where there is a natural barrier to access. The large rock formation extending out into the water there would be visible from the water in lieu of the latitudinal minute line.

The Westport Municipal Advisory Council was adamant about keeping this access open for locals who depend on this area for food. We all believed it would be.

Re: Comments on NCRSG Round 3 North Coast Draft MPA Proposal

Dear Chair Gustafson and Members of the Blue Ribbon Task Force:

The InterTribal Sinkyone Wilderness Council (Council) has reviewed the Round 3 Draft Marine Protected Area Proposal adopted by the Regional Stakeholder Group. With certain modifications set out below, the Draft Proposal offers a reasonable balancing of science, conservation, Tribal and other stakeholder considerations.

We first express our appreciation for the efforts of the Regional Stakeholder Group, the Science Advisory Team and the Blue Ribbon Task Force to work with the Tribes in the North Coast Region to accommodate Tribal traditional non-commercial uses in the MPA design and siting process. Resolution of the issue of Tribal uses has been made more difficult by the failure of the Marine Life Protection Act to address the issue directly, which presents unique challenges to you, the RSG and the SAT. We look forward to working with you to finalize a network of MPAs that fully addresses the needs and concerns of the North Coast Tribes and the Sinkyone Council, and that can be recommended to the Fish and Game Commission for adoption.

Our comments focus on the following issues, and specifically pertain to MPAs located within the geographic area of concern for the Council and the Tribes of Mendocino and Lake Counties:

- 1) Identification of Tribal uses within the MPA regulations;
- 2) Modifications of the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR;
- 3) Modification of the Vizcaino SMCA;
- 4) Clarification of Tribal uses in the Ten Mile Estuary SMRMA; and
- 5) Special seasonal closures at Rockport Rocks and Vizcaino Rock.

Each of these is discussed below.

1. Separately Identify Tribal Uses as a Distinct Category of Use in MPA Regulations

The strength of the RSG's Draft Proposal is the unequivocal expression of intent to avoid interference or impairment of Tribal traditional, non-commercial uses in the design and creation of MPAs. The RSG sought to carry out that intent by listing the species that would be allowed to be taken by Tribes as a subset of "recreational uses." That intent is also expressed in the RSG's motion, which declared that each MPA should include the following language:

“All California Indian Tribal traditional, non-commercial fishing, gathering, and harvesting for subsistence, ceremonial or stewardship purposes shall be uses that are exercised by the members of California Indian tribes and tribal communities.”

We appreciate the diligent efforts of the RSG to find a sensible way to accommodate Tribal uses in the design of MPAs. We believe the Proposal is a significant step toward a reasonable resolution of this issue. However, several important modifications to the RSG’s Proposal will ensure that the Initiative achieves the goal of avoiding adverse impacts to Tribal uses.

We have stated before our opposition to the inclusion of Tribal uses within the category of recreational uses and we reiterate that position here. It is critically important for Tribal uses to be separately and distinctly identified in the regulations, in order to ensure that if there are future changes in recreational uses, those changes will not automatically affect Tribal uses. Moreover, identifying Tribal uses as a separate category is consistent with the unique legal status of North Coast Tribes as sovereign governments with aboriginal rights, a status the State has frequently recognized.

The RSG may have been under the impression that State law in its current form does not allow separate identification of Tribal uses, and that, as a result, there is no option other than to include them in the recreation category specified in the Marine Life Protection Act. That is not the law. Despite numerous requests, no one from the Department, the Attorney General’s Office or the Initiative has been able to produce to us a legal opinion which analyzes this question. We were promised in February that such legal guidance would be forthcoming, but thus far none has materialized. In our August proposal, we set out the legal basis for separate recognition of Tribal uses, and we will not repeat that here. Suffice it to say, by regulation, the Department has on at least five occasions recognized special rights on behalf of California Indian Tribes who are identified by name along with the species that can be taken and the gear type allowed. Our proposal for separate identification of Tribal uses is entirely consistent with longstanding State practice.

Our request is simple and straightforward: that the Blue Ribbon Task Force recommend that the Fish and Game Commission follow its well-established precedent and include Tribal uses in the appropriate MPAs as a separately identified category of use. The language proposed by the RSG is a good starting point in meeting this goal, but we would like to propose that the Task Force recommend the following language to accommodate Tribal uses where appropriate:

California Indian Tribes and Tribal communities shall be allowed to fish, gather, and harvest marine resources for traditional, non-commercial subsistence, ceremonial, religious stewardship purposes.

In our view, this language provides more legal efficacy than the RSG proposed language, which simply declares the kinds of uses that qualify as Tribal.

We ask that the BRTF recommend this language for the following proposed MPAs: Big Flat SMCA, Ten Mile Beach SMCA, Big River Estuary SMP and Navarro River Estuary SMRMA.

2. Modify the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR to Ensure Continuation of Tribal Uses

The RSG Proposal contains eight (9) MPAs in the portion of the North Coast Region where the Council’s member Tribes continue to use the marine environment for traditional, non-commercial purposes. The Council is especially concerned about the effect of the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR on the ability of its member Tribes to

continue traditional, non-commercial uses for the purposes we have outlined. All of these areas are within the ancestral and aboriginal territories of the Council's member Tribes and are considered by the Tribes to be extremely important gathering and harvesting areas

Although the RSG stated its intention that Tribal uses should be allowed to continue within SMRs, we do not believe that approach is viable. As you know, the Marine Life Protection Act prohibits the take of all plant and animal species within SMRs, and the Fish and Game Commission would not have authority to authorize such use by regulation. Consequently, we do not believe it is legally possible to include Tribal use language in the regulations for the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR.

To enable continuation of traditional Tribal uses in these important locations, areas along the near shore need to be designated for Tribal-only traditional, noncommercial gathering and harvesting use. From the Council's perspective, it is irrelevant whether this area is designated an SMCA or a SMP. We propose that for the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR the Tribal use zone would consist of a near shore "ribbon," beginning at the mean high tide mark on the east and stretching 1,000 feet west into the ocean. The SMR would begin where the SMCA or SMP ends. This arrangement is consistent with the intent of the RSG that Tribal uses should be allowed to continue in this area.

Our proposal raises two questions: first, would such an exclusive Tribal use zone comply with the MLPA science guidelines; and second, is there legal authority for the Commission to create such a zone without specific legislative authority?

As to the science guidelines, we have asked the SAT to evaluate the exclusive use ribbon approach as a viable alternative to prohibiting all Tribal take within SMRs. We await the results of that analysis. We are confident that it will show that traditional, non-commercial Tribal uses will not adversely affect the Level of Protection currently assigned to the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR. As we have demonstrated in previous submissions, Tribal uses have minimal impacts on the marine environment, due to the small number of Tribal members carrying out traditional practices and the stewardship ethic by which such practices are conducted. Provided the SMCA or SMP is not opened to gathering or harvesting by the general public, the risk of downgrading the Level of Protection is small to nonexistent. Stated another way, creation of a Tribal use ribbon along the lines we propose is consistent with the conservation goals of the MLPA. We note also that our approach is perhaps more protective of the environment than the SMCA recently created by the Fish and Game Commission for the Kashia Band of Pomo Indians, which is open for use by the general public.

This conclusion is consistent with the motion adopted by the BRTF on May 17, in which it is stated: "To maximize conformance with SAT guidelines, the NCRSG is urged to couple offshore SMRs and/or MPAs with high or moderate levels of protection with near shore SMPs (or SMCAs as appropriate) designed for tribal resource protection." This is precisely the approach the Council urges with regard to the Sea Lion Gulch SMR, the Ten Mile SMR and the Point Cabrillo SMR.

As to the legal question, it is not necessary for the Blue Ribbon Task Force to resolve this issue in order to recommend the creation of a Tribal use ribbon to the Fish and Game Commission. We continue to seek to engage counsel for the Department, the Commission and the State on this question, and expect to have this matter clarified before the final MPA proposal is submitted to the Commission for consideration. If this legal question is subsequently resolved in favor of the Tribes, as is our expectation, and the Task Force has not included the ribbon approach in its set of recommendations, it may be too late to fully develop that approach at the Commission stage of the proceedings. A recommendation from the BRTF, contingent on resolution of the legal question, will enable the Tribes to make their strongest case before the Commission.

3. Modify the Vizcaino SMCA to More Effectively Ensure Continuation of Tribal Uses

The Council asks that the BRTF recommend the creation of a ribbon for Tribal-only traditional, noncommercial gathering and harvesting use only along the near shore of the Vizcaino SMCA, in order to ensure that Tribal use activities may be carried out in this near shore area that, to our knowledge, is not used by the general public for harvesting of marine species. The RSG recommended that certain species and gear types be allowed here for Tribal use as part of the category of recreational uses. Although the intent of this recommendation is to accommodate Tribal uses, we believe a Tribal-only use ribbon would be more effective and appropriate. In our approach, Tribal uses would be confined to an area from the mean high tide extending 1,000 feet off shore and the uses by the general public would begin at that line and extend to the western boundary of the SMCA. This is workable because most of the public uses are and will continue to be concentrated beyond the 1,000 line. With regard to the science guidelines, the creation of a near shore Tribal ribbon is likely to increase the Level of Protection and conservation values because the public harvesting of marine resources would be prohibited along the near shore.

4. Confirm Tribal Uses in the Ten Mile Estuary SMRMA

In Round 3, the RSG proposed to re-designate this MPA from a State Marine Conservation Area to a State Marine Recreational Management Area (SMRMA). Although state law authorizes fairly broad human activities within SMRMAs, the RSG recommended that take of all living marine resources should be prohibited. In legal and practical effect, this would make this MPA an SMR. In fact, the RSG notes that if it is determined that waterfowl hunting is not allowed, then the designation should be changed to an SMR. Round 3 Description of Marine Protected Areas in the Round 3 NCRSG MPA Proposal at page 23. The RSG's intent here is ambiguous, as waterfowl hunting would not be allowed under the no take recommendation currently in the RSG's Proposal.

Regarding Tribal uses, the RSG's intent is to "accommodate traditional, non-commercial, tribal activities when it becomes possible within California legal authority." *Id.* at 24. As we have explained previously, such legal authority already exists. We ask that the BRTF recommend that Tribal traditional, non-commercial uses be included in the regulations applicable to this MPA, so that when the question of legal authority is resolved, the Commission may act on the recommendation without the need for a revised proposal. If Tribal uses are left out of the BRTF recommendation for this MPA, it may not be possible to make the necessary revisions once the legal issue is resolved.

5. Confirm Tribal Access to Rockport Rocks and Vizcaino Rock During Seasonal Special Closures

The RSG's proposal to establish a no entry zone 300 feet around Rockport Rocks and Vizcaino Rock would impair traditional Tribal use activities for the period of time the closure is in effect. The RSG acknowledged "overlap" with Tribal activities as to the Vizcaino Rock area, but erroneously indicated "[t]here is no overlap with tribal activities" as to the Rockport Rocks area. Round 3 NCRSG Special Closures Recommendation at page 4-5. Actually, there is overlap at both proposed Special Closure locations. The RSG also expressed its intention "to allow access for traditional, noncommercial, tribal gathering, subsistence, harvesting, ceremonial and stewardship activities" in all special closure areas. *Id.* Because the authority of the Fish and Game Commission to designate these areas as Tribal-only traditional, noncommercial gathering and harvesting use zones depends on resolution of a legal question beyond the responsibilities of the BRTF, we ask that you confirm in your recommendation that Tribal uses should be permitted in these areas. In that way, when the legal issue is resolved, the Commission can simply adopt your recommendation.

The InterTribal Sinkyone Wilderness Council supports any adjustments to the proposed Round 3 MPAs that may be called for by the Tribes of Humboldt and Del Norte Counties to ensure the continuation of their traditional, non-commercial cultural uses for those MPAs that are located within the Tribes' ancestral and aboriginal territories.

Our request for these modifications should not obscure the fact that the RSG faithfully and diligently sought to apply the Tribal use policy and directives from the BRTF in designing the Round 3 Proposal. It has laid a strong foundation on which genuine legal protection for continuing Tribal cultural uses can be achieved. We are committed to working with you to complete that task.

Sincerely,

Priscilla Hunter,  
Chairwoman

MLPA North Coast Round 3  
Attn: Mr. Ken Wiseman  
MLPA-I Team  
Regional Stakeholders  
Science Advisory Team  
Blue Ribbon Task Force

To whom it may concern:

Please find enclosed a copy of a petition against more MPAs being placed in the North Coast Region. We are now reaching over 800 signatures and counting of mostly Humboldt County locals from all walks of life including biologists, teachers, fishermen, students, small business owners, environmentalists, the unemployed and many other professions. We are mailing off copies to our local, state and federal representatives to request their aid in obtaining relief from such an inflexible, divisive and expensive law by suspending the process.

Yours truly,

Donald Sack,  
775 Upper Pacific Drive  
Shelter Cove,  
Whitethorn, CA 95589  
Humboldt County resident.

CC: 2<sup>nd</sup> District Supervisor Cliff Clendenen,  
California State Assembly Member Wesley Chesbro  
California State Senate Member Patricia Wiggins  
California Governor Arnold Schwarzenegger  
U.S. Representative Mike Thompson  
U. S. Senator Dianne Feinstein  
U. S. Senator Barbara Boxer  
President Barack Obama

From: Citizens Alliance - wishing to vote for no additional MPAs in the North Coast Region allowing only the existing Punta Gorda State Marine Reserve.

We the undersigned represent a large group of disenfranchised, directly affected stakeholders, who would like to propose no expansion of the existing MPAs in the North Coast region, an option that has been excluded from stakeholder proposals. We would also propose the State protect existing MPAs from mineral extraction, aquaculture, pollution, energy farms and other damaging manmade effects.

Melissa Miller-Henderson; Program Manager MLPAI

From: Citizens Alliance - wishing to vote for no additional MPAs in the North Coast Region allowing only the existing Punta Gorda State Marine Reserve.

We the undersigned represent a large group of disenfranchised, directly affected stakeholders, who would like to propose no expansion of the existing MPAs in the North Coast region, an option that has been excluded from stakeholder proposals. We would also propose the State protect existing MPAs from mineral extraction, aquaculture, pollution, energy farms and other damaging manmade effects.
